Recommendation Letter for _____

I write this letter to express my whole-hearted recommendation of _____ for Ph.D. at your esteemed organization. I have known him in the capacity as his instructor for the course of "Renewable Energy Resources" as well as the Head for the Faculty of Mechanical Engineering at PIEAS. In these years I am pleased to place on record the consistently dedicated academic performance of _____ during his study at Pakistan Institute of Engineering and Applied Sciences (PIEAS).

____ is a student who strives for excellence and constantly ensures to give his best at whatever he does. He does not evade challenges rather he goes looking for them in ways that can help him augment his knowledge and personality. As his instructor I truly appreciate the inquisitive nature and active participation he demonstrates while taking lectures. He stands strong among the top 1% of his class with a CGPA of 3.94 which is one of the highest in the department.

Also, as one of the examiners of his final year project and I am impressed with the performance he has shown so far. The project aims to analyze the development of velocity boundary layer and effects of flow separation using wind tunnel experimentation and CFD. _____ has also shown an impressive performance in semester projects and lab experiments for many other different courses. His research interests are multi-dimensional and I am sure, if given an opportunity, he can contribute immensely to your institution's research objectives.

To talk about some of his qualities other than his academic excellence, I can say that _____ is blessed with sound managerial and leadership skills which will definitely help him excel sharply in practical life. He has the ability to engage and lead people, resolve complex issues and always reach a positive conclusion as evidenced from his engagement in student societies.

As the Department Head, I affirm that all of the faculty members speak highly of him and he treats all of his instructors with utmost respect. There has never been an incident where he was involved in a disciplinary issue. Given his aptitude and unwavering passion in core Mechanical Engineering disciplines, I can guarantee that this program is a great fit for him to specialize in. His interests and aims of specialization match with those of your esteemed program. _____ will make a valuable contribution to your program and I strongly recommend him as a deserving candidate from our university.
