# Recommendation Letter for _____

It is an immense pleasure for me to write this recommendation letter for _____ to support his application for ***Türkiye Burslari Masters Scholarship Program*** offered by Government of Turkey.

I have known **Taimoor Khan** from last few years as his professor at Pakistan Institute of Engineering & Applied Sciences (**PIEAS**). I first encountered him when he was a fresh undergraduate student at PIEAS University. I taught him 2 courses – **Circuit Analysis and Electronics Circuit Design** in his 1st and 2nd year of BS Electrical Engineering respectively. He performed very well in both the courses.

I found him a high-pitched and very cooperative learner in the class. He understands difficult concepts with quite an ease and demonstrates his learning in a collaborating way in the class. He has extraordinary communication skills. He is always precise and well organized. I have checked considerable written work of Taimoor Khan in his lab reports. He is extremely good at documentation. He has been in close interaction with me in these 4 years not just in academic area but in the non-academic area as well.

He worked as the student member at Institute of Electric and Electronics Engineering (**IEEE**) **PIEAS Student Branch** for 4 years and held different posts during this time. He retired as **Finance secretary** and **Vice Chairperson** IEEE in April and August 2018 respectively. Being the Councilor of IEEE PIEAS Student Branch, I observed that he has exemplary financial management and leadership skills. I found him having a high sense of responsibility and spirit of volunteerism. He worked hard to organize Career counselling sessions for government schoolchildren and presided **IEEE Pakistan Students/ YP/WIE Congress 2018, which** won us the **Best Student Branch** award by IEEE Islamabad Section.

Although the academic environment at PIEAS University are very challenging, However Taimoor managed to create a balance between his academics, co-curricular and volunteer activities. He has cumulative grade point (CGPA) of 3.26/4 after successfully completing 3 years of BS Electrical engineering at PIEAS. In terms of academics, He can be ranked among the top 10% students among all the batches of PIEAS.

His interest and devotion towards studying power systems are the compelling reasons for me to recommend him for this program. I confidently declare that Taimoor will perform competently in this Master program and has good potential, if challenged to contribute in your institute.

_____

Deputy Chief Engineer and Associate Professor

Department of Electrical Engineering'

PIEAS-Islamabad, PAKISTAN
